PROJECTS

LOGICAL - a webiste that you can play logic games with your friends

- A website that you can play some normal mind games such as sudoku, puzzle and solitaire. You can signup/login to a new account and save your play history. Playing games and some of the key features: Feedback form, Changing your own information, etc. I also add 2FA into login/signup (using OTP code in login and verification email in signup).
- My own project: I working in design and code in both Frontend and Backend part. In Frontend part, I used Figma to design and choosing ReactJS + CSS to code. In Backend I used ExpressJS + NodeJS, nodemailer in NodeJS to control automated email and MongoDB as database layer, hosting in Vercel app.
- Using tools/tech: Figma, Vite - React, CSS, NodeJS - ExpressJS, MongoDB, Vercel.

ViRoute - A webpage that show the route of bus in Vietnam

- A website that you can search bus route around Hanoi, the capital city of Vietnam. You can signup/login to a new account and save your favourite departure - destination. Searching for bus route and some of the key features: Feedback form, Changing your own information, etc.
- Teamwork: I working in design and code mostly in Frontend part, inject map into the web part and integrating with the Backend team. Also building, contributing to the database and showing in RailwayDB.
- Using tools: Figma, Vite - React, CSS, Leaflet - OpenStreetMap, RailwayDB - MySQL, Django, Vercel
